

KIT NANOPLASTIC 220V

Hot stapler, extremely handy and easy to use

090101

NANOPLASTIC is a hot stapler which has become the simplified option for the auto body repair professionals since its launch. It is the definitive solution, an essential tool in the body shop for his small and compact presentation, easy to use and manageability. The Nanoplastic hot stapler always operates at maximum power and the staples can also be adjusted in three different positions, making easier to weld in difficult angles or positions. Nanoplastic is sold at a very competitive price and offers an outstanding value for money.
