

MASK & UP

Available in four different sizes

| 100249 | 100241 | 100242 | 100243 |
|------------|-------------|------------|------------|
| 9+11 mm | 10 mm | 12 mm | 15 mm |
| 80° | 120° | 80° | 80° |

The product has a **pre-cut system every 38 mm** to ease an application on car bodies. Mask'&'UP consists of an adhesive paper tape and a flexible polyester film of **10**, **9+11**, **12** or **15 mm** wide attached to one of the lateral sides of the paper tape. Mask'&'UP withstands temperatures up to 80°C and does not leave any residue once the application is finished.

It is available in four different sizes. It allows to cover both car glass rubber and mouldings or windscreens. The tape needs to be placed behind the windscreen rubber. The next step is to remove the strip which protects the adhesive part of the tape so it can get stuck on the car body in order to push the rubber and lift it up.

By doing so we will protect the surface which we do not need to paint and we will ease the access of the paint behind the car glass rubbers to prevent marks on them.

APPLICATION:

- Plastic strip on a self-adhesive tape facilitating the masking of new windshields and windows.
- Makes masking corners easier.
- Prevents spraying onto rubbers.
- Pre-cut every 38 mm for easy application.

| Code | Measures | Units | U. box |
|--------|------------------|-------|--------|
| 100249 | 9 + 11 mm x 10 m | 1 | 72 |
| 100241 | 10 mm x 10 m | 1 | 72 |
| 100242 | 12 mm x 10 m | 1 | 72 |
| 100243 | 15 mm x 10 m | 1 | 72 |
