2. DESCRIPTION OF THE PRODUCT

U202 Universal Black Gloss is a lacquer spray for metals, wood, paper and hard-plastics. It builds up a tough film that has good adhesion. This product has a high gloss when using a well selected alkyd-/acrylic resin combination. The surface gets a protective layer and a completely new look. For good anti-corrosion properties on bare metals, it is recommended the use of a special anti-corrosion primer.

- Yield: 400 ml for 1-2 m²
- Coverage: Dependent on the film thickness: 2 to 3 layers
- Application: Free surface of rust, dirt; let it dry. Cover the parts which should not be painted. Shake the aerosol well before use during 2 to 3 minutes. Spray several thin layers from a distance of approx. 30 cm. Turn the aerosol upside down after use and spray till only gas is coming out.
- Overpaintable: After 10 minutes. After 60 minutes tack-free. Dry within 12 hours. Through hardening takes several days (at 20°C, 40µ layer).
