

TECHNICAL DATA SHEET

1. IDENTIFICATION OF THE PRODUCT

NAME OF THE PRODUCT Special continuous folding machine for masking tape
CODE 100105

2. DESCRIPTION

Special continuous folding machine to eliminate the line in feathering effects on the body of the vehicle. Suitable for 19 mm tape.

A perfect edge every time you paint: it is a simple and unique tape dispenser that helps you to achieve smooth blended edge using ordinary masking tape.

3. USAGE

Just feed any masking tape (19mm) and this folding machine magically folds under one edge of the tape automatically as you pull the tape.

Use this machine tape to mask off area to be spray painted. Follow the curves and turn the corners as you mask. Places like hood, trunk, and door jambs as well as body crease lines all can be bended to produce seamless transition from painted side to the unpainted side without sanding the masking line. No more hard tape lines.

It will only takes 30 seconds to install the tape into the machine.

With this dispensed tape, there is just enough over spray that gets underneath the folded tape edge to provide a seamless smooth finish. No need to sand the rough edges.

Without this special folding machine, regular masking tape will build a ridge as you spray paint. Once you remove the tape, sanding is required to get rid of the irregular and rough edges.
