

# TECHNICAL DATA SHEET

## 1. IDENTIFICATION OF THE PRODUCT

**NAME OF THE PRODUCT** Black sanding control powder with applicator 150 g  
**CODE** 060310

## 2. DESCRIPTION

Dry Control Powder is the quickest and most cost effective system to highlight imperfections such as pinholes and scratches in filler and primer. In addition, ensures body work is flat and body styling contours are true prior to final coat application. Its objective is to visualize irregular areas and imperfections immediately. By using this product, the necessary foundation of sanding work is ensured, both for manual sanding and for manual or machine sanding. It does not contain solvents and does not clog the abrasive. Moreover, it adapts perfectly and leaves the surface completely dry from paint or primer.

## 3. TECHICANL CHARACTERISTICS

Material:	Powder
Color:	Black
Basis:	Borosilicate glass granules, iron oxide powder.
Density:	3 g/cm <sup>3</sup>
Shelf life in a dry place at 20 ° C:	24 months
Package:	Can be supplied with an applicator pad
Material of the applicator pad:	foam rubber

## 4. APPLICATION

### Surface:

The surface to be treated must be clean, dry and free of grease.

### Dosage:

Strongly press the applicator pad. The hole on the applicator pad should be directed to the surface to be treated. Distribute the Dry Control Powder with the applicator pad.

## 5. SAFETY INFORMATION

The above mentioned technical characteristics and other information, especially the recommendations for the application and use of our products, are based on our current knowledge and experience, taking into account the application of materials under normal conditions. Practically, materials, surfaces and working conditions may differ from normal conditions to such an extent that neither this information nor any oral consultations imply any guarantee for the results of the work and any liability arising out of any relationship, unless we are accused of malicious intent or gross negligence. In this case, the user must prove that he ison time in writing and fully informed us of all the points necessary for a correct and reassuring judgment. The patent rights observance of any third party is mandatory.

Also, our general terms and conditions of supply and the latest instructions for use, which are available upon request, are in effect. Guidance on handling and disposal of waste is given in the MSDS on our products and the specifications of the Association of the Chemical Industry Employers' Insurance.

The technical information is in accordance with our experience. We assure the quality of the product. However, the conditions of use are not under our control and we cannot assume any responsibility of the obtained results.
