## 2. DESCRIPTION

---

As a cold weather lubricant sealant solution of AUTOSCRUB, NANOSKIN BANANA ICE lubricates the paint so well while gliding the AUTOSCRUB back and forth. The gel solution creates better lubrication barrier between AUTOSCRUB and the surface to prevent excessive abrasion in cold weather. BANANA ICE is a 1-step lubricant polymer sealant that actually smoothes the surface, enhances gloss, dissipates static, and adds additional protection to your finish.

Removes the pollutants such as dust, fingerprints or other impurities. It also can be used on glass, chromed plate and plastic. It improves the reflection on shine materials such as chromed-plated rims and mouldings.

- **Contains silicones**
- Cold weather AUTOSCRUB lubricant sealant
- Water based
- Restores the brilliance of a showroom finish
- 1-step lubricant sealant Gel
- Advanced polymer protection

## 3. SURFACE PREPARATION AND APPLICATION

---

### 3.1. Directions for AUTOSCRUB

1. Thoroughly wash vehicle free of dust, sand, and dirt.
2. Mist sufficient BANANA ICE onto the surface evenly.
3. Polish the surface with dual action orbital polisher using light pressure (Low Speed).

NOTE: Sufficient lubrication is crucial to the AUTOSCRUB application. Plain water is NOT an adequate lubricant.

The technical information is in accordance with our experience. We assure the quality of the product. However, the conditions of use are not under our control and we cannot assume any responsibility of the obtained results.
