

NANOSKIN CRYSTAL-CLEAR VOC Free Glass Cleaner

- VOC Free
- Contains no harmful or harsh chemicals, including ammonia or alcohol
- Uses an ultra-fine polishing agent
- No streaks, no smears
- Safe for glass, ceramics, stainless steel, acrylics, paint surfaces, polystyrene, ABS and polycarbonate

CRYSTAL-CLEAR highly concentrated VOC Free Glass Cleaner contains no harmful or harsh chemicals, including ammonia or alcohol that damages your car or the environment. By using an ultra-fine polishing agent, it gently removes dirt and grime from glass and clear plastic by polishing it away. The final result is a polished finish without streaks or smears. Safe for use on glass, ceramics, stainless steel, acrylics, paint surfaces, polystyrene, ABS and polycarbonate.

DILUTION: 40 : 1

DIRECTIONS:

1. Dilute with water to designed strength.
2. Spray or wipe on surface.
3. Wipe with a clean dry towel or glass towel for a sparkling clean surface.

TIPS: All glass cleaners are sensitive to dirty towels. So, if you use a towel that's previously been used for polishing or waxing, remaining product residue is bound to leach out and smear your glass. Dedicated glass towels are your best bet.
