BOSSAUTO PAINT SYSTEM RED

190µm

- Threaded system that allows for a quick and secure pressurized closure.
- Greatly facilitates and speeds up the painter's work compared to traditional systems.
- Increased anchoring and closure security.
- Offers a comprehensive solution that allows the same cup to be used for mixing and painting. As the cup is a single-use flexible type, it facilitates cost savings in the painting process.
- The single-use flexible cup system is designed to create a vacuum, which allows for 360° homogeneous painting. The Bossauto painting system is suitable for applying paint, varnish, and primer.
- Its filter incorporated in the lid allows for filtering and spraying in a single solution, and it also includes a cap for temporary storage of leftover material.
- Lower cup height, which enhances stability and ease of use.
- High-security 1/4 turn closure. Wider protective ring to prevent potential spills due to incorrect closure.

- **100% RECYCLED PLASTIC THREAD**
- **LID 20% RECYCLED MATERIAL**
- **RIGID CUP 20% RECYCLED MATERIAL**
