

POLISH GENIO B1

FINE |-----| COARSE
CUTTING ACTION

LOW |-----| HIGH
GLOSS

NONE |-----| HIGH
PROTECTION

PLUS

P1200
Remove P1200
Sanding Marks

ADVANTAGES

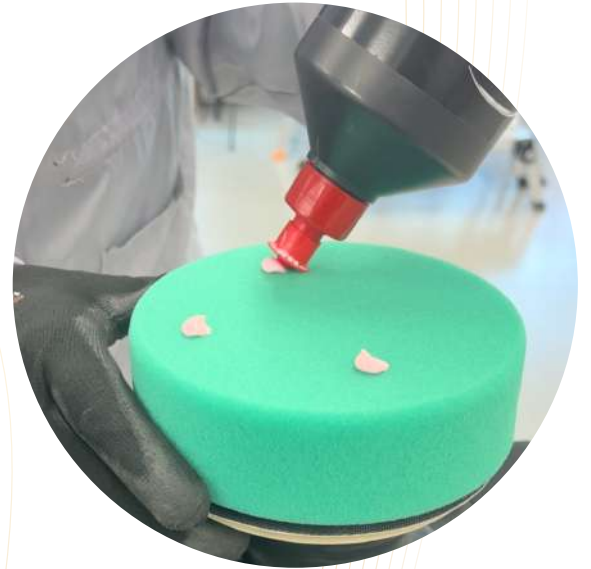

- One step polishing (remove p1200)
- Two step polishing (remove p600-800)
- Easy wipe
- Drying
- Hologram free result
- Easily remove big scratches
- No dusting
- Silicone free
- Compatible with rotary and orbital polisher
- Low consumption
- Very low V.O.C
- Health & safety

HOW TO USE

WITH ROTARY POLISHER: use with **Nanoskin Wool buffing pad (100862)** or with **Medium cutting pad yellow T80 (100535)** to remove sanding marks P800-P1200 and finish with **Soft polishing pad orange T40 (100533)** to restore the original shine without hazes and holograms. For a perfect single-pass result, use **B1** with the **Heavy cutting pad green T120 (100550)**.

- **STEP 1.** For a better abrasive action, use **B1** with a **Nanoskin Wool buffing pad (100862)** or with the brown abrasive sponge pad **Heavy cutting pad green T120 (100550)** at a speed of 1200-1800 rpm.

- **STEP 2.** For a polishing action without hazes, halos and holograms, use **B1** with the **Heavy cutting pad green T120 (100550)** at a speed of 1200-1800 rpm or with the **Soft polishing pad orange T40 (100533)**.

WITH ORBITAL POLISHER: Use with **Medium cutting pad yellow T80 (100535)** to remove sanding marks P800-P1200 and finish with **Soft polishing pad orange T40 (100533)** to restore the original shine without hazes and holograms. For a perfect single-pass result, use **B1** with **Heavy cutting pad green T120 (100550)**.

- **Step 1.** Use **B1** with **Medium cutting pad yellow T80 (100535)** (P800) for a quick abrasive action.

- **Step 2.** Use with the **Soft polishing pad orange T40 (100533)** to restore maximum brilliance without hazes and holograms. Do not use too much product.
