

SYMMETRIC

100591

A QUICK WAY TO PROTECT THE INTERIOR OF YOUR VEHICLE.

Bossauto's new **SYMMETRIC** masking tape has two symmetrical tape faces to protect the interior of the vehicle and the rubber of the different openings during the repainting process.

The use of **Symmetric** speeds up the entire masking process and reduces the use of materials (weatherstripping, tape, plastic with tape, etc.), improving the profitability of the workshop and **saving** the user **time** in the process of preparing the vehicle.

Symmetric comes in **20 metre x 8 cm** rolls with **pre-cut every 12cm** for easy application in curved areas.

Water **resistant**

Drying with **UV** lamps

Heat resistant up to **110°C**

ADVANTAGES

- > Reduces the use of masking materials
- > Speeds up masking process
- > Applicable on all movable areas of the vehicle: doors, rubber doors, door seals, bonnet, boot, etc.
- > Adhesion on sheet metal and glass
- > Total protection of the interior of the vehicle and of the rubber seals of the openings.
- > Improved paint finish in the protected area.

A TRIM MASKING TAPE

MASK&UP has a **pre-cut system** every **38 mm** for the tuse in bodywork. The product consists of a paper strip with solvent based adhesive according to the characteristics attached, and a flexible polyester 190my strip, attached to one side of the paper tape. The characteristics of the tape allow supporting temperatures up to **120°C** and leaves no residue once finished the application.

It is available in **4 different sizes**. It allows to cover both car glass rubber and mouldings or windscreens. Tha tape needs to be placed behind the windscreen rubber.

Water **resistant**

Drying with **UV** lamps

Heat resistant up to **120°C**

APPLICATION

- Plastic strip on a self-adhesive tape facilitating the masking of new windshields and windows.
- Makes masking corners easier.
- Prevents spraying onto rubbers.
- Pre-cut every 38 mm for an easy application.
